

Your market knowledge. Our product team.

Partnership opportunities in Bahrain, for officials
and business owners.

Why Bahrain

What we could build

Ways to partner

Getting started

You know Bahrain. We build the product.

You bring the people, the problem and local knowledge. We design, build and run the software.

You · local knowledge

Prodmake · design & software

Each project agrees who does what.

Why Bahrain

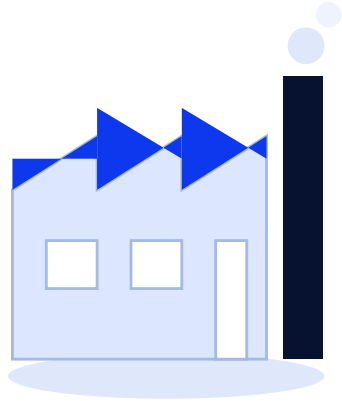

National priorities that all need better software.

Bahrain is investing in five sectors.

Economic Vision 2050 puts investment priority on these five. Each one runs on software.

Finance

Manufacturing

Logistics

Tourism

Technology

Finance leads Bahrain's economy.

17.6%

of real GDP in 2025 came from financial services, the largest non-oil sector.

15.1%

came from manufacturing, the second largest.

Information & eGovernment Authority · national accounts, April 2026

Government services are nearly all online.

900+

government eServices on bahrain.bh
and the MyGov app.

95%

of services are online. The aim is nearly
all by the end of 2027.

iGA, April 2026 · Bahrain Smart Cities Summit 2026

Bahrain has an AI policy, and an AI skills drive.

2025

National AI Policy. Cooperation is one of its four pillars.

Information & eGovernment Authority · July 2025 and May 2026

50,000

Bahrainis to be trained in AI by 2030.

Most of Bahrain's residents are not Bahraini.

53.5%

of residents are non-Bahraini. Services need Arabic first, then many languages.

1.6M

people live in Bahrain (June 2025).

What we could build together

Examples to test with partners. Each starts with one service or one business.

One request. One reference. Many entities.

A resident or business signs in once. Each entity approves its part, and the applicant follows one status.

Keep approvals moving.

Licences, permits and internal requests reach the right person. Staff see what is still waiting.

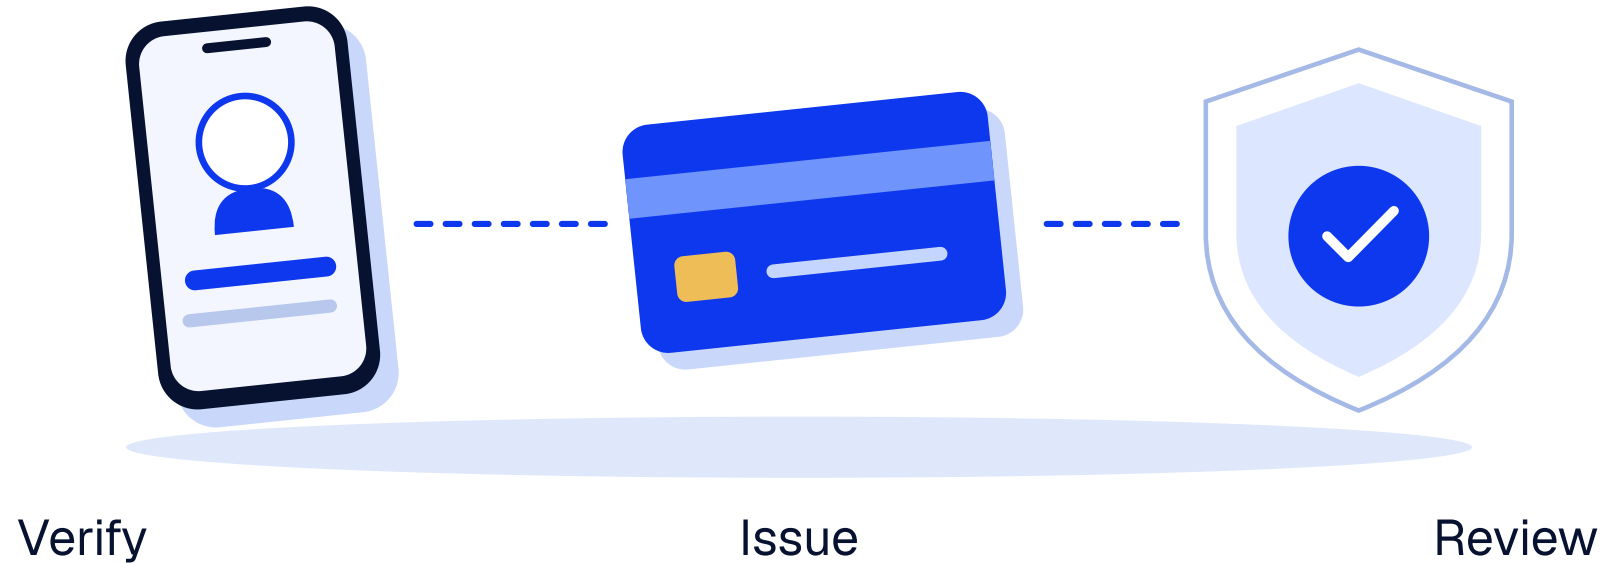

Request

Approved

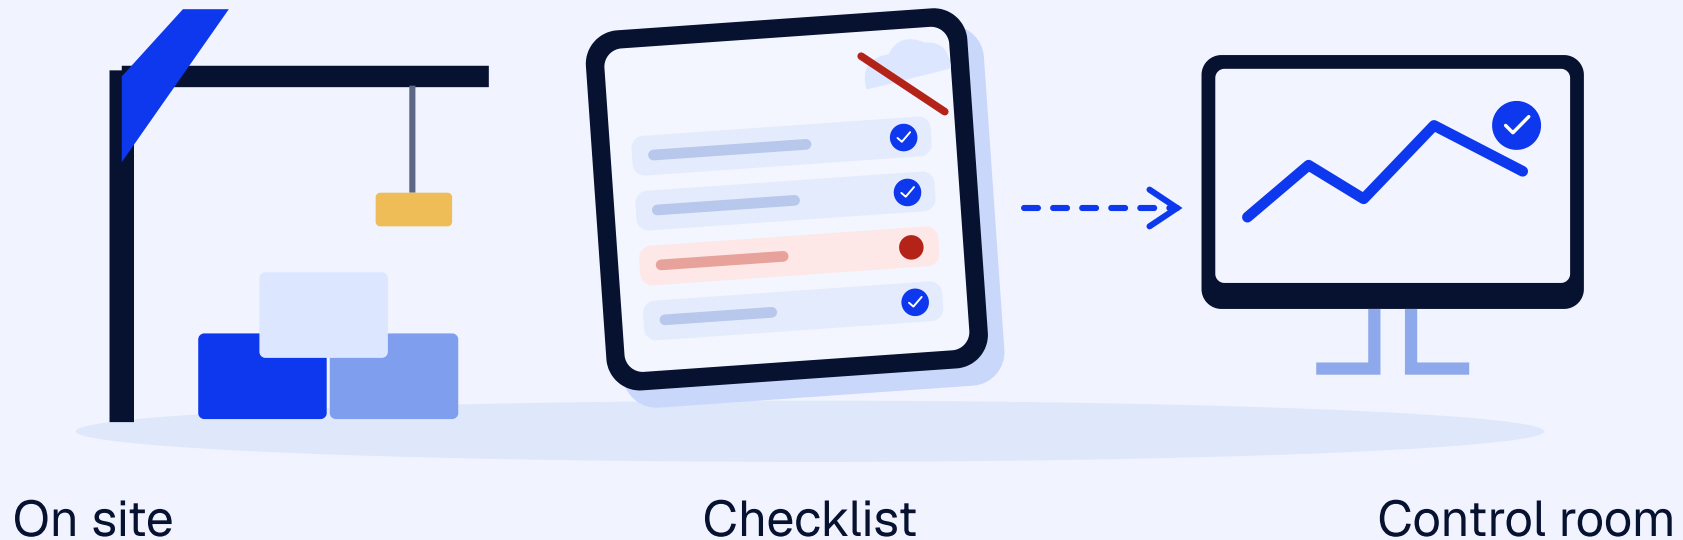

Open an account without a branch visit.

Banks and fintechs verify customers and collect consent online. Only real exceptions reach compliance.

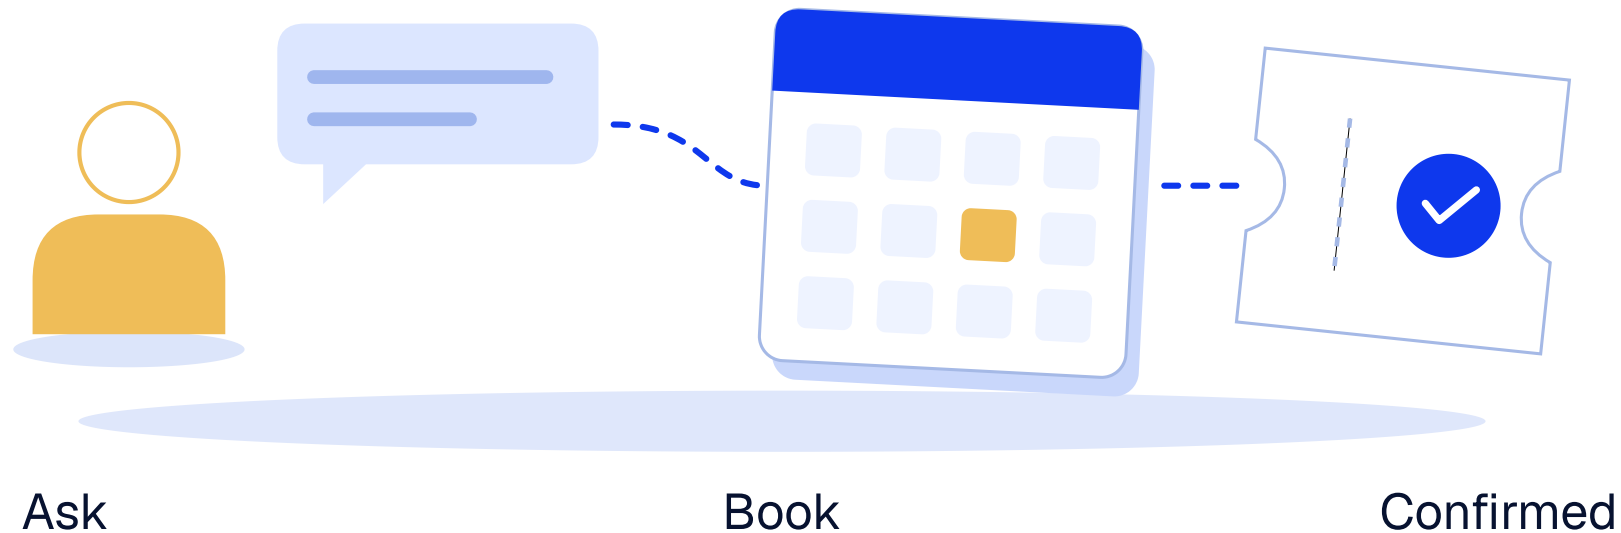

Inspections that work offline.

Port, plant and fleet crews check equipment with or without signal. Defects reach the control room on sync.

Answer visitors and book in their language.

Hotels, venues and event organisers answer questions any time, and confirm only what the booking system accepts.

Keep each order moving.

Cafés, restaurants and shops send each order to the right staff and see what is ready.

Keep property work moving.

Residents report a repair. Staff assign it, and the technician closes it with a photo.

Building

Technician

Make learning visible.

Schools and training teams share lessons, record practice and see who needs help.

Lessons

Progress

Family businesses. One clear view.

Groups with several companies see ownership, assets and documents in one place.

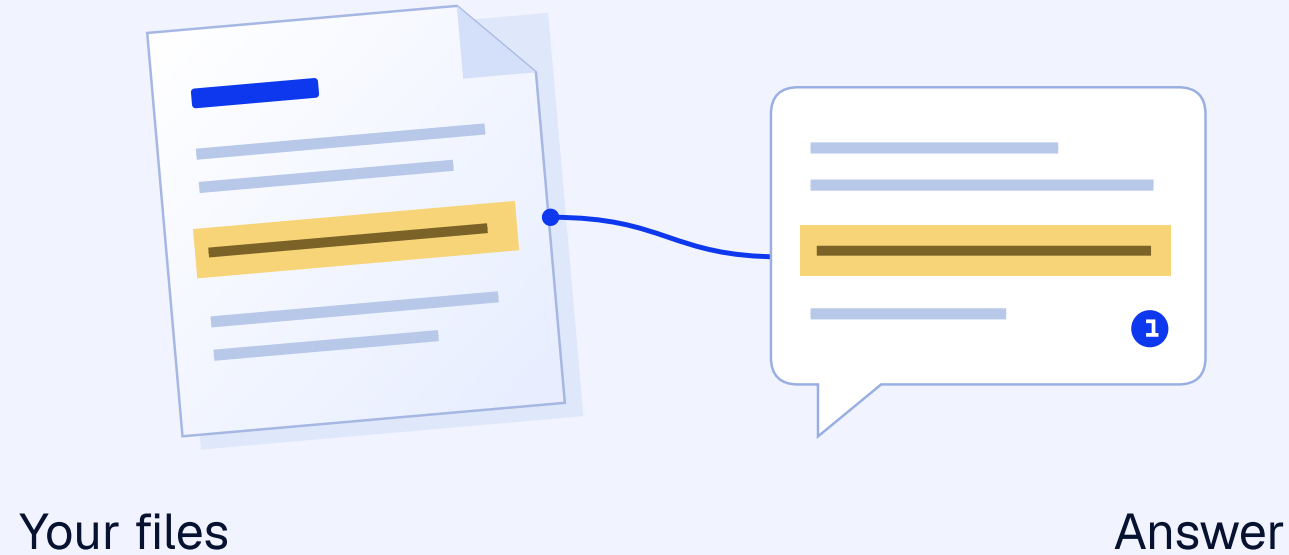

Companies

One folder

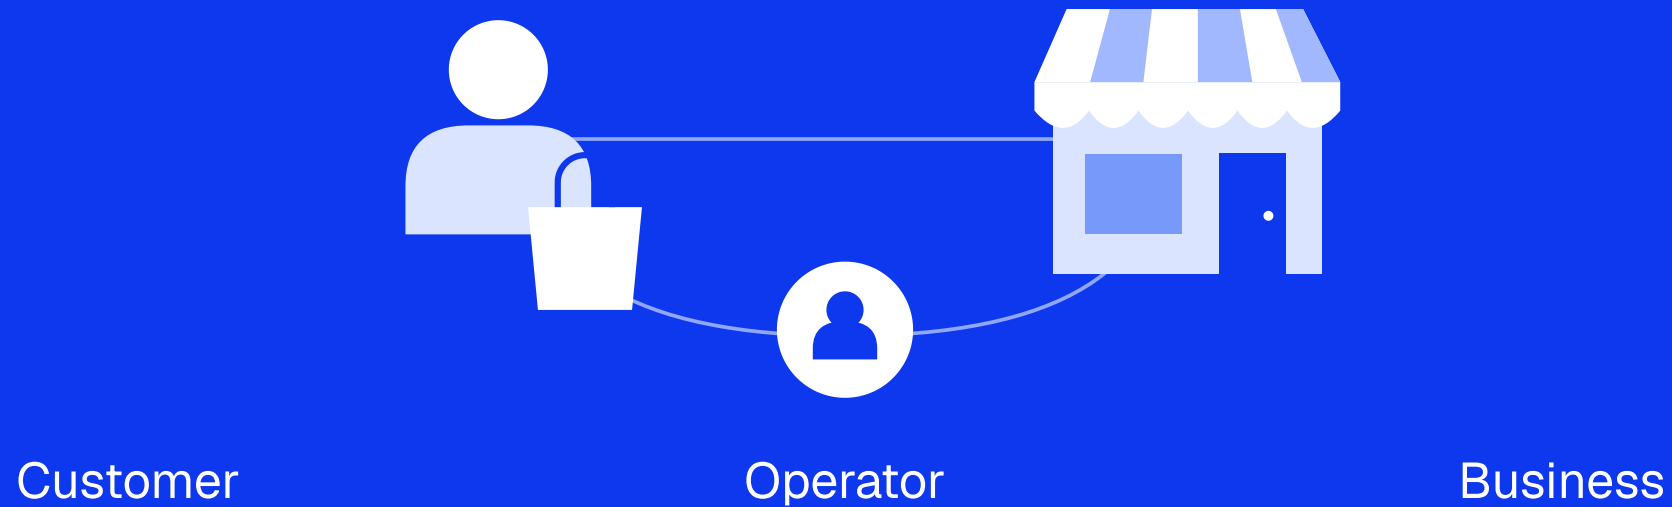

Answers your staff can trace.

An AI assistant answers from your own documents and links to the page each answer came from.

Connect buyers and local providers.

A marketplace where customers find local businesses, and your team sets the rules.

Why Prodmake

Founder-led, with national, enterprise and field software behind us.

Founder-led. You partner with the person who builds it.

Kuan leads product, design and engineering.

13+ years

in production systems.

Government, enterprise, field

From national e-government to offline crew apps.

Specialists per project

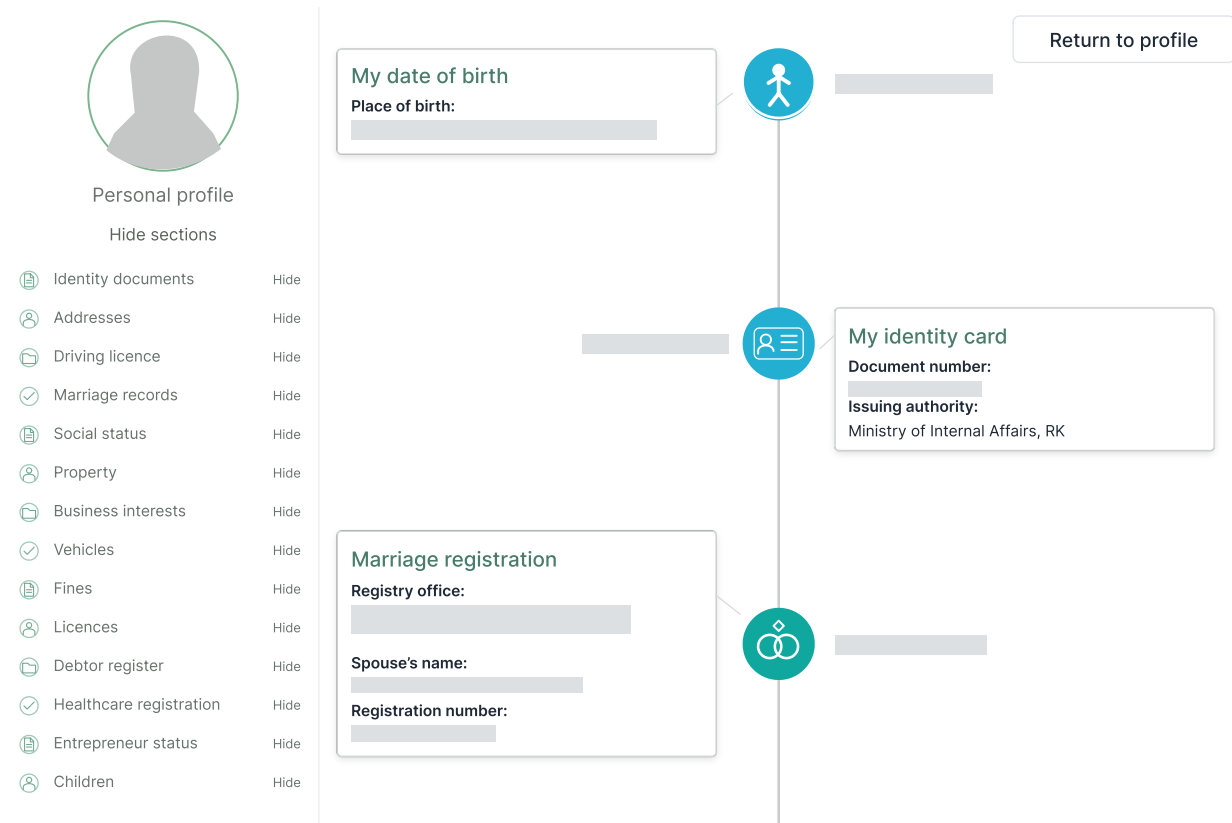

Design, engineering, data and Arabic language quality.

A citizen sees their records in one place.

my.egov.kz · Kazakhstan · 2013 to 2015

The national e-government personal account.

Kuan designed the first version's screens and led the frontend build.

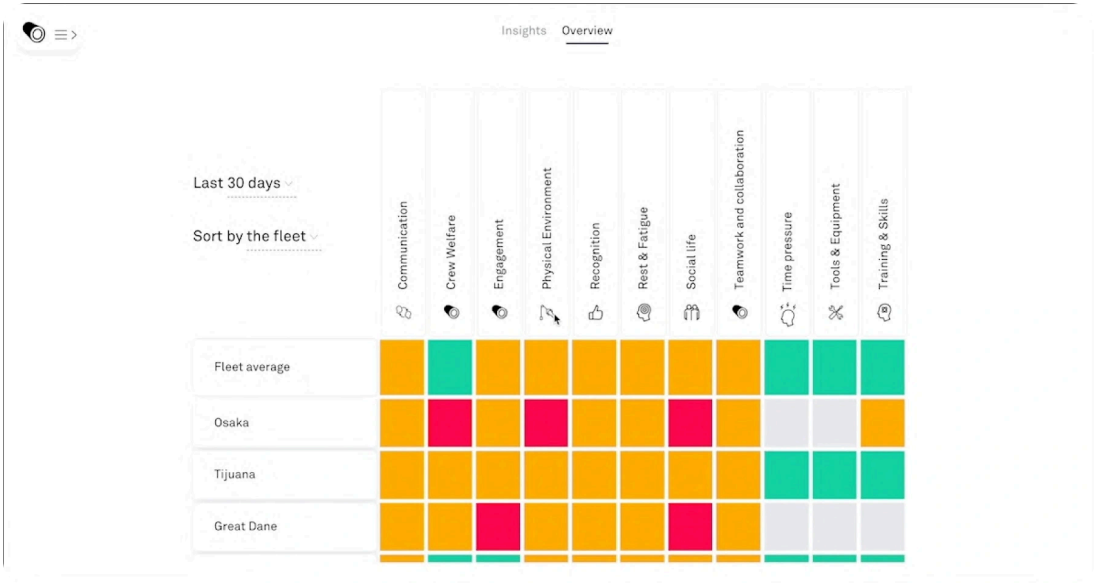

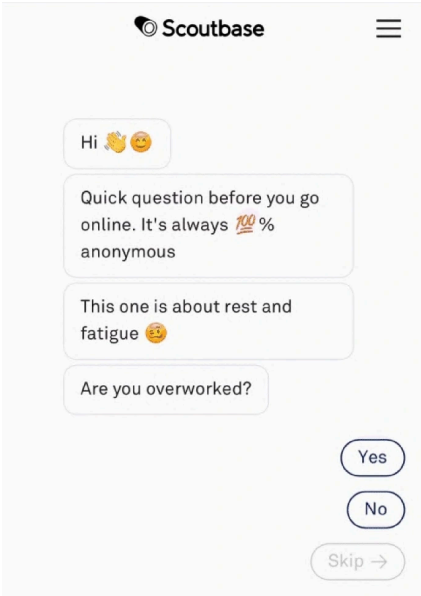

English redraw of a published 2016 screen. Personal fields removed.

Field crews need apps that work offline.

Scoutbase · client work as fractional CTO

4,000+ maritime workers.

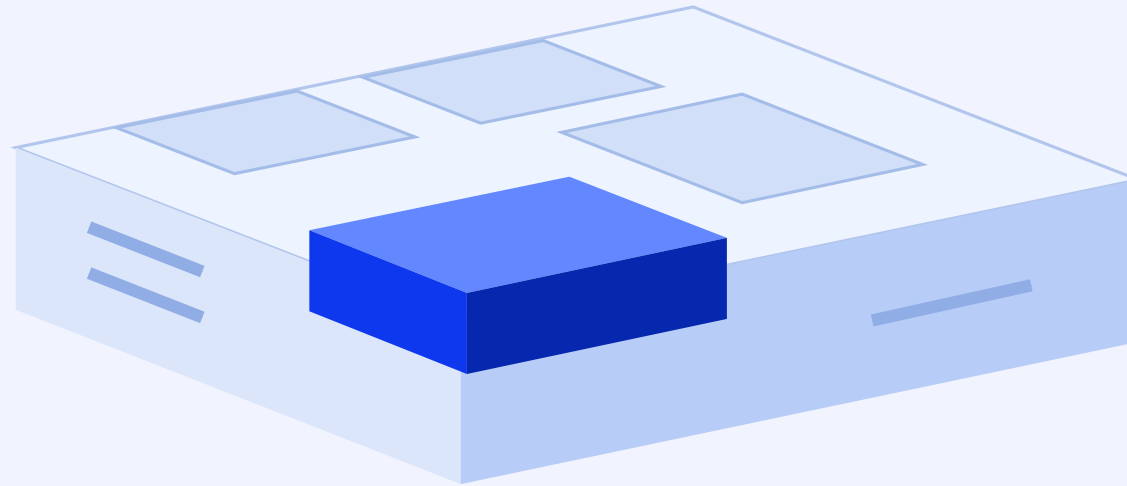

Crew input saved offline and synced into one fleet view.

Screens from Scoutbase's public 2023 presentation.

Regulated software that has to hold up.

At AuditBoard, an audit, compliance and risk platform, Kuan worked on parts of the product inside a larger team.

Workflows

Data

Upkeep

AuditBoard · employment and contract work · 2022 to 2023

Tenant apps for real estate customers.

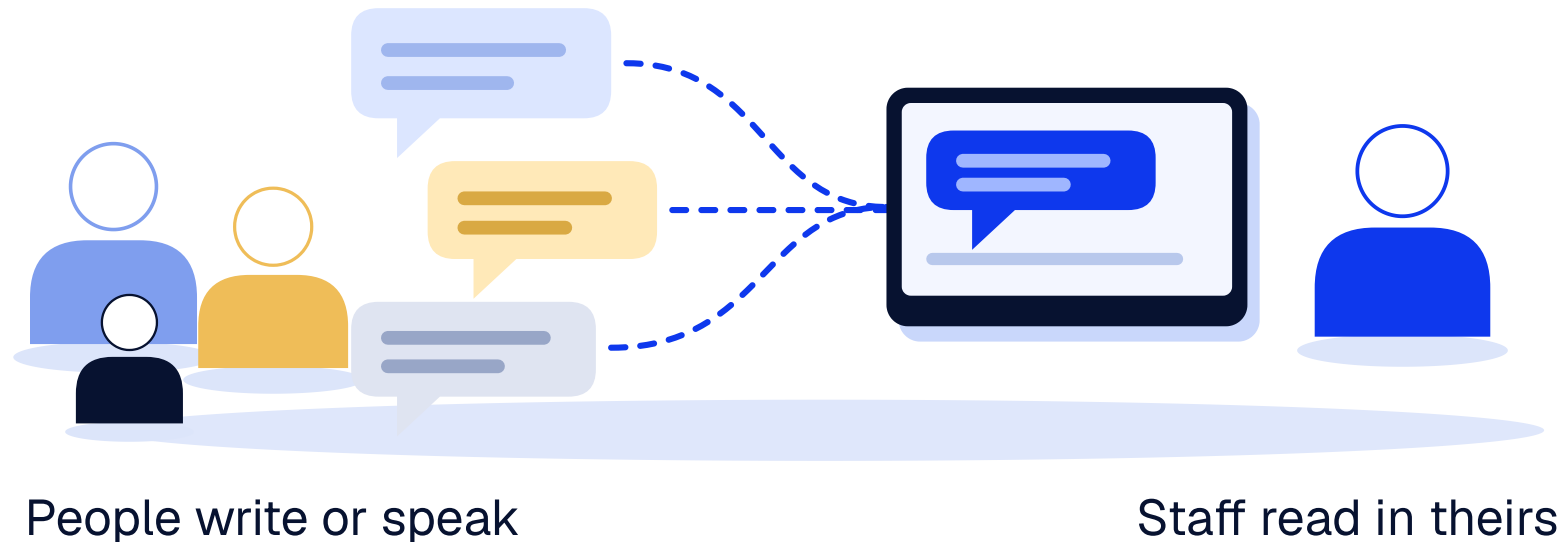

“Kuan was able to quickly and effectively respond to the requests of our customers as well as identify their potential needs even before they were apparent.”

Andy MacDonald, Director of Engineering, VTS (formerly Lane)

Lane Technologies · employment · 2019 to 2020 · portfolios included Colliers and Tishman Speyer

Our founder's product works in 16 languages.

Tellhaven takes reports in each person's language. AI summarises them, and staff read in their own.

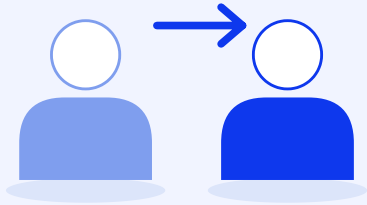

Ways to partner

For officials and for business owners. Roles and terms agreed in writing.

Four ways to partner.

Choose the role that fits the work. We stay separate companies, and the agreement sets each role.

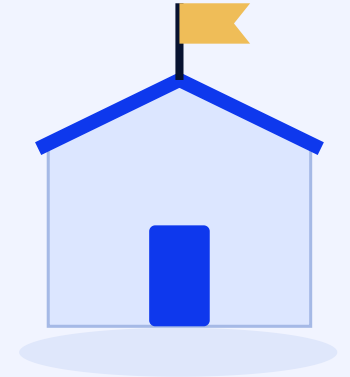

Introduce

Deliver together

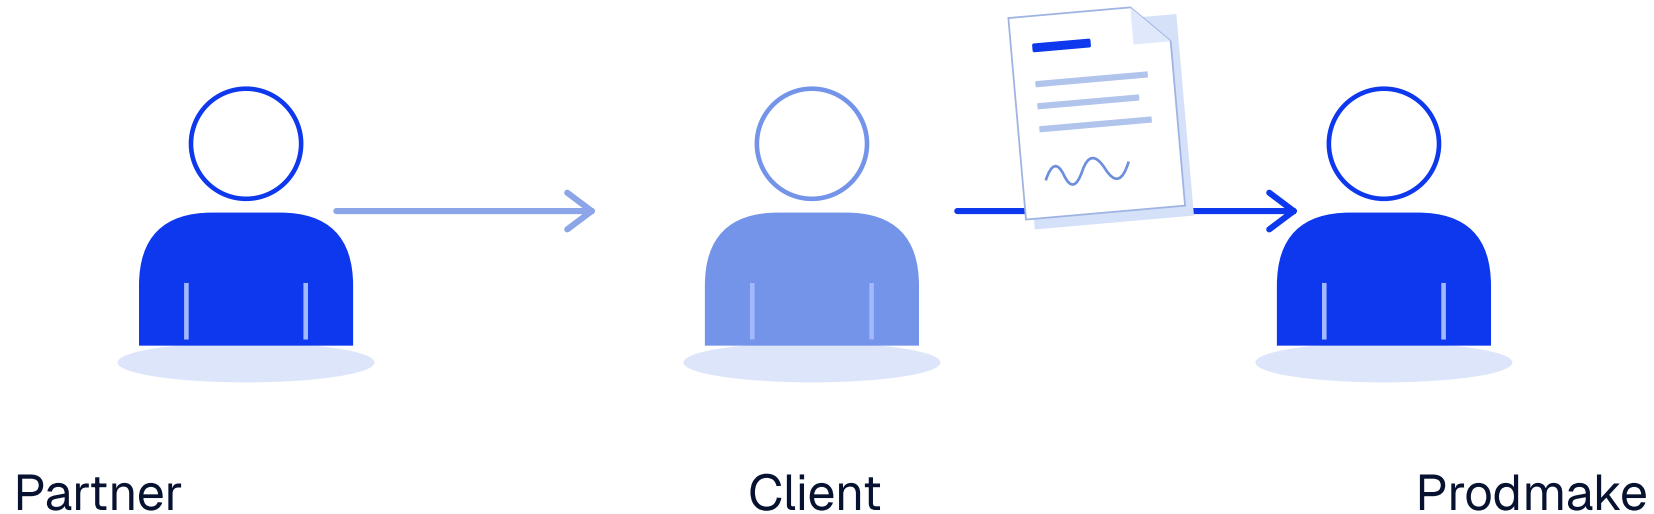

Lead the contract

Co-found

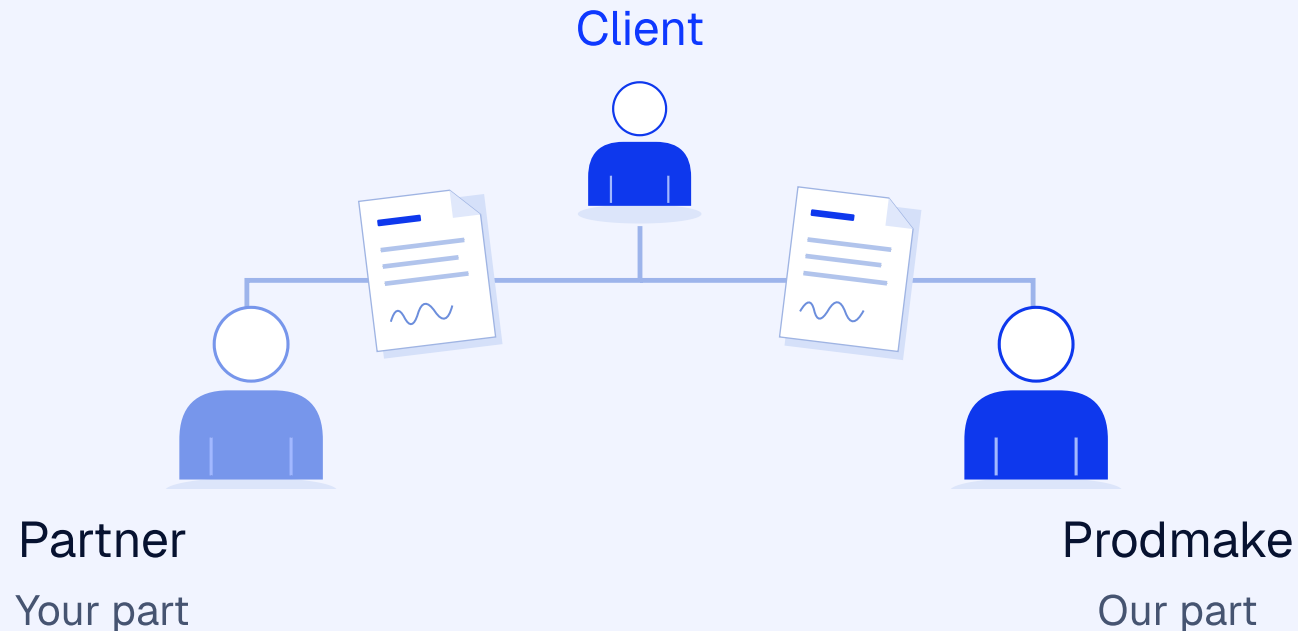

You introduce. Prodmake delivers.

You connect us with an organisation that needs software. It signs with Prodmake; your role is agreed first.

One client. Two teams with clear jobs.

You lead your part, such as local delivery or design. We build the software. Separate contracts, one plan.

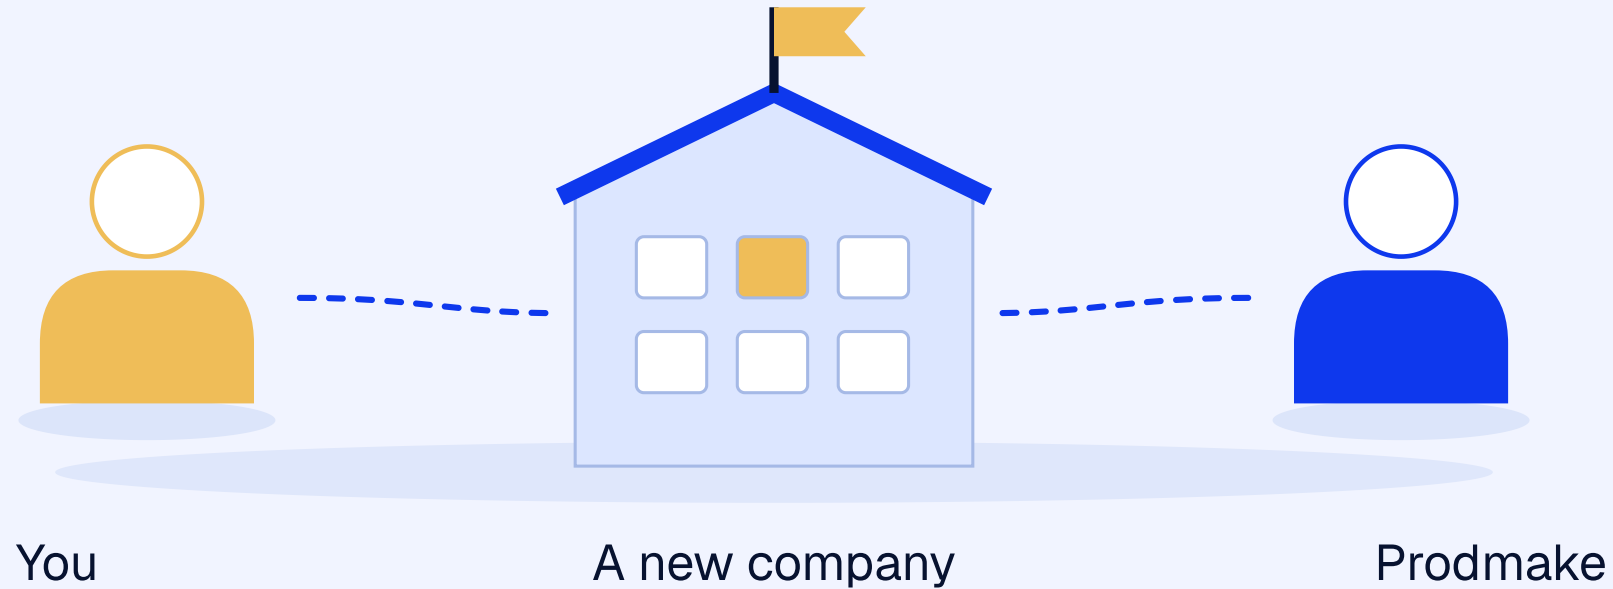

You sign. We build.

When the client wants one local contractor, you hold the contract and Prodmake works under you.

Build a new company together.

You bring customers and market access. We bring the product team. Ownership is agreed per venture.

Agree what each side earns.

An introduction, your own work or leading the contract are each paid differently. We agree it in writing first.

Introduce

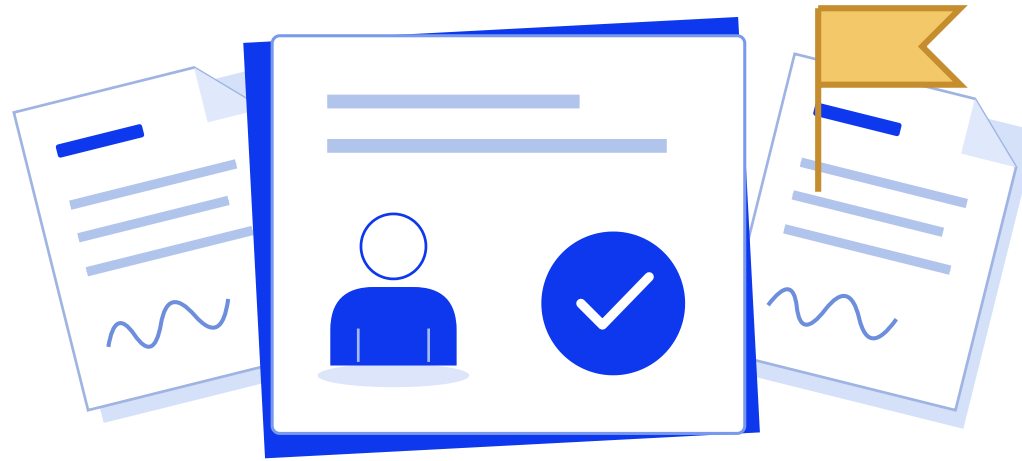

Your work

Lead role

For officials: prove one service first.

Pick one service, pilot it with a small group, and decide from the results. Your staff are involved from day one.

One service

One pilot

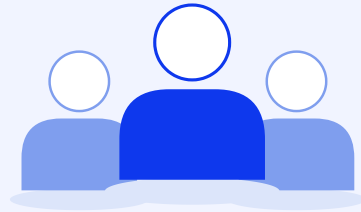

One decision

For business owners: three ways in.

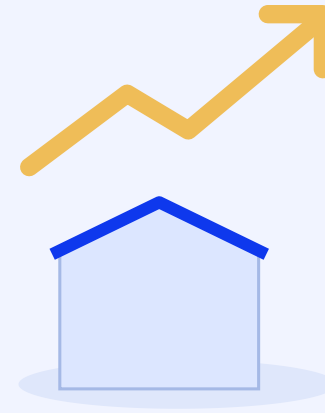

Digitise your own business, offer software to your clients, or start a product company with us.

Your business

Your clients

A new venture

Getting started

Local rules, local support, and the first conversation.

Agree local needs first.

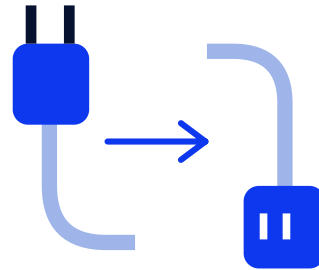

Before any build, we agree language, where data lives, which local systems to connect and who supports it.

Arabic & English

Data in Bahrain

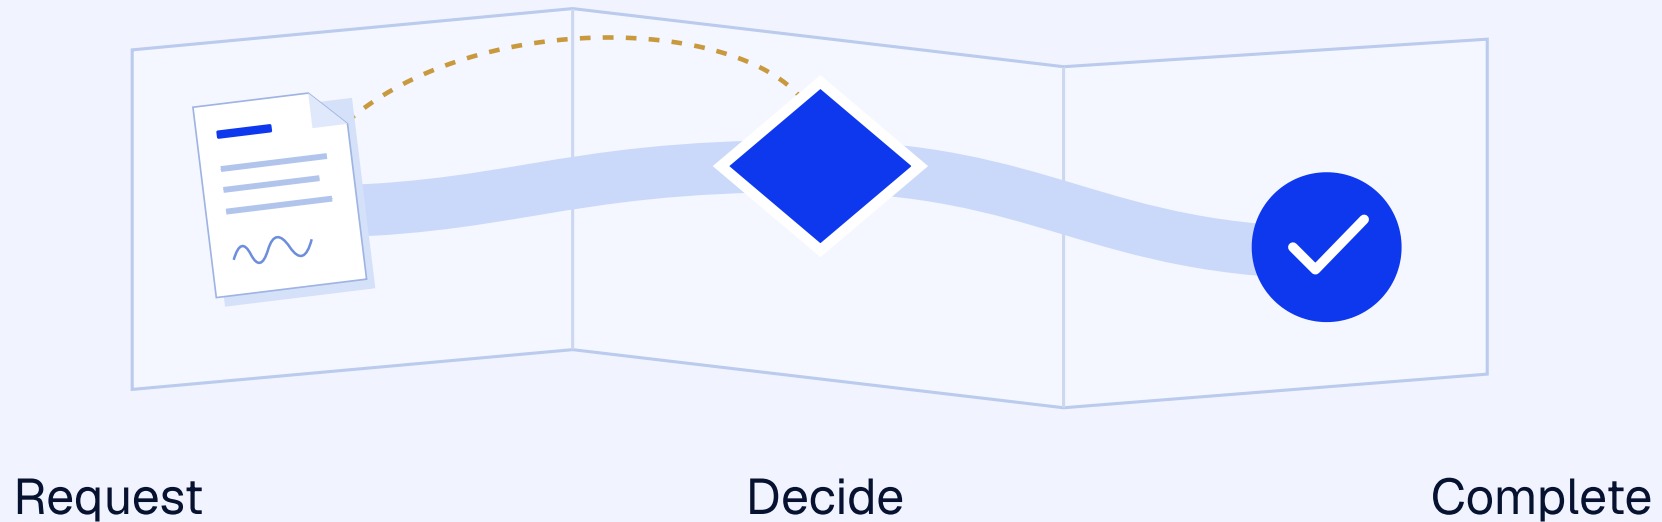

Local systems

Contracts & support

AI drafts. People decide.

Assistants answer and prepare. Approvals, payments and exceptions stay with staff, and every step is logged.

Bahrain makes it easier to start.

100%

foreign ownership open
to ICT firms

30 days

to register after
winning an
international tender

Up to 50%

of SME software costs
from Tamkeen

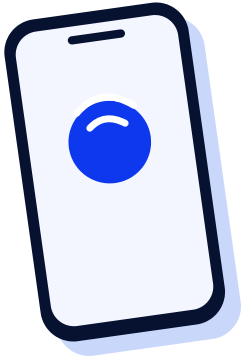

2017

fintech sandbox at the
central bank
